A Change in Culture and Philosophy: One BU

We should adopt a new, inclusive, integrated, and interconnected view of Boston University and its academic mission: a culture and philosophy of One BU. The aim is to cultivate...
University Council Approves Open Access Plan
BU to create free archive of faculty research

02.17.2009  By Art Jahnke and Jessica Ullian
Welcome to BU Digital Common

The Boston University Institutional Repository contains documents and publications authored or co-authored by BU faculty, students, and staff.

Digital Common is an open access repository, which means that the full text of the work deposited here is freely accessible to the world via the web. Access is restricted only in unavoidable instances, for example where publisher copyright restrictions prevail. However over 90% of scholarly publishers worldwide now allow some version of the documents they publish to be made available in a repository such as this.
Video Guide to Electronic Theses and Dissertations

We have created videos on thesis prep and related issues, intended to help GRS students graduating...
Data Management Outline

It is important to have a plan for the management of research data throughout the data life cycle. Funding agencies such as the NSF and NIH have begun to require data management plans as part of the grant application process.

Funding Agencies

To create a data management plan for a research project, you will need to answer a series of questions about the data that will be created by the project, and then document the answers in a plan.

Questions for a data management plan

1. What data will be created during the research project?
Set the Default to OPEN ACCESS.
Town Hall on Open Access, Intellectual Property, and Academic Life at BU

Tuesday, October 16, 2012
3-5pm

The action of the hydrochloride salts of yohimbine, allyl-yohimbine, butyl-yohimbine and ethyl-yohimbine on isolated rabbit intestinal strips
Chaset, Nathan (Boston University, 1935)

The adaptation of man to life at high altitude
Bragg, Ernest Atherton (Boston University, 1940)
When a resident from sea level ascends to high altitude, several important adaptive responses must be made if the body is to maintain its efficiency in the new environment. At altitudes above 12,000 or 13,000 feet, the ...

Adapting soccer to the needs of secondary school boys
Daly, Charles Bennett (Boston University, 1940)

Adjustment problems of refugees as a challenge to social group work
Ekstein, Rudolf (Boston University, 1941)

Adoptive applicants and children released for adoption
